Greystones, Co. Wicklow, Ireland

PROFESSIONAL PROFILE

Reliable and adaptable professional based in Ireland, with international experience in food production, warehouse operations, quality control, inventory processes and fast-paced team environments. Strong attention to detail, discipline, time management, teamwork and willingness to learn. Currently studying Analysis and Systems Development at FIAP, building foundations in web development, programming logic, JavaScript, React, Java, SQL, Git and GitHub. Open to opportunities in production, warehouse, administrative support, junior/trainee technology roles and entry-level web development.

KEY SKILLS

- Production and packing operations
- Food production standards, hygiene and Health & Safety awareness
- Quality control, product checking and process consistency
- Inventory support, scanning systems and data verification
- Administrative support, spreadsheet-based information and documentation
- Team collaboration, communication and workflow organization
- Customer-focused attitude and willingness to support daily business needs
- Web development foundations: HTML, CSS, JavaScript, React, TypeScript basics, Git/GitHub
- Programming and systems foundations: Java, Python, SQL, databases and logic

PROFESSIONAL EXPERIENCE

Stoats — Process Operative | *April 2025 – January 2026* | Midlothian, Scotland, United Kingdom

- Progressed within Stoats from packing activities into a Process Operative role, supporting a wider range of production, workflow and quality responsibilities.
- Worked in a fast-paced food production environment focused on production flow, quality control, process consistency and daily targets.
- Reviewed production schedules, specifications and spreadsheet-based information to support accuracy in weights, batches and quality requirements.
- Collaborated with team leaders and colleagues to organize workstations, align responsibilities and maintain continuous production flow.
- Monitored product quality, hygiene standards, Health & Safety procedures and process compliance throughout daily operations.
- Identified workflow issues, reported bottlenecks and supported practical problem-solving to improve efficiency and reduce errors.

Amazon — Warehouse Associate | *October 2024 – February 2025* | Bathgate, Scotland, United Kingdom

- Used scanning technology and warehouse management processes to receive, track and record inventory accurately.
- Supported picking, packing and shipping activities with attention to order accuracy, time management and operational targets.
- Performed quality checks to verify items, conditions and order matches, helping to reduce shipping errors.
- Worked in a high-volume environment while following Health & Safety procedures and daily performance expectations.

Stoats — Packer | *February 2024 – September 2024* | Scotland, United Kingdom

- Maintained production flow by packing, checking and preparing products according to quality and output requirements.
- Followed Health & Safety, hygiene, HACCP and PPE standards in a food production environment.
- Performed quality inspections on finished products, identifying and reporting defects to minimize waste.
- Verified batch codes, packaging accuracy and product presentation before final distribution.
- Collaborated with team members in cutting, stacking and packing areas to support workflow efficiency.

EDUCATION

FIAP — Bachelor's Degree in Systems Analysis and Development | *January 2026 – February 2028* | Remote / Brazil

- Current studies include programming logic, software engineering, web development, databases, SQL, Java, JavaScript, Git/GitHub and systems fundamentals.

ETEC — Technical Education in Electrical and Electronic Engineering | *November 2013 – November 2015* | São Paulo, Brazil

- Technical foundation in electronics, electrical systems and industrial processes.

TECHNOLOGY LEARNING AND PORTFOLIO

- Online CV : <https://jnramoos-hue.github.io/cv/>
- GitHub: github.com/jnramoos-hue
- Currently building academic exercises and portfolio projects related to front-end development, JavaScript, React, TypeScript, SQL and software fundamentals.

CERTIFICATIONS

- Programming Logic
- Electronics Technician

AVAILABILITY

- Available for full-time, part-time, temporary, entry-level, trainee and junior opportunities.
- Open to roles in Ireland, remote opportunities and international entry-level positions.
